— HABITAT III — NETWORKING EVENT REPORT

Submitted by Lead Organization	
Name of lead organization	Universidad Católica del Norte
City and country where lead organization is based	Antofagasta, Chile
Title of the event	Assessing the impacts of global warming and urban heat island effect in Latin American cities
Date of Networking Event	10/18/2016
Networking Event room number	R11
Name of partner organizations with city and country where these organizations are based	INER, Quito, Ecuador
Number of participants	100
Percentage of women participants	50%
Background information on Networking Event (themes, issues, context).	Urban heat island, climate change, urban vulnerability
Concise summary of the event proceedings, including key points discussed.	We discussed the methods to assess the impacts of the urban heat on the energy consumption and on the public health in Guayaquil, Lima, Valparaíso and other cities of the continent.
Recommendations emerged from discussions at the Networking Event .	Mayor recommendation is to obtain new data about the phenomena, in order to develop adaptation and mitigation strategies for the south american countries. Education of population on the topics emerged as an important issue to be achieved.
